Your "Best In Class" Cable Assembly Source

In today's market, partnering with dependable and knowledgeable suppliers can mean the difference between success and failure. And RF and microwave cable assemblies have become a critical item in high tech products, such as benchtop and automatic test equipment, wired and wireless voice and data

communications, broadcasting, and specialized instrumentation for space and aircraft. That's what makes Semflex a supplier of choice among customers who strive for excellence in competitive markets. More than 30 years of dedication to engineering and manufacturing high quality cable and cable assemblies has resulted in a depth of experience and solid manufacturing base that allow us to deliver a highly dependable product, with an outstanding level of service, for a competitive price. Which

in turn enables your company to stay focused on what you do best.

Twinax/Triax Assemblies

Semflex is more than an assembly house—we are a vertically integrated manufacturer.

Because we are heavily involved in the design and manufacture of coax cable and connectors, we bring a higher degree of expertise to the task of manufacturing cable assemblies.

Ultra-Low Loss Triax

What You Need, When You Need It

We understand that you have a business to run, so we offer the fastest delivery in the industry: "Ship Same Day" service is available on 150+ standard in-stock products, and "48 hours or less" shipment is available on custom assemblies. Custom assemblies with COTS components often "Ship Same Day" when ordered before noon.

Custom Splitters and Power Dividers

Semflex is uniquely equipped to support both small and high volume orders:

- Factory operates 7 days/week, facilitating quick turn on end of week orders.
- Over 40,000 square feet of capacity on 7.5 acres.
- Off site capabilities provide additional high volume/cost effective options.

Certified For Quality

The company's World Class Quality Management System (QMS) was one of the industry's first to be registered to ISO9001/2000. Semflex is highly process driven throughout the organization and utilizes SPC to monitor, control and continuously improve each process. Closed loop process improvement practices similar to Six Sigma, Kaizen and Lean Enterprise

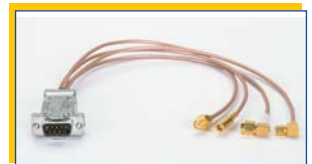

Semi-Rigid Cable Assemblies

allow us to reduce variation and minimize costs. As a consequence, our products, processes and QMS are site-qualified by many major well-respected companies.

Micro Miniature Coax
